Art Unit: 2834

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 4 and 7 are rejected under 35 U.S.C. 102(a) as being anticipated by Flowers.

Flowers teaches a Lithium Tantalate SAW substrate with interdigitated electrodes of gold, silver or copper (col. 2, lines 35-49). Since each of these materials are the same as those preferred and claimed by applicants they obviously have densities within the claimed range.

Claims 2 and 3 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5 and 6 are allowed.

Further cited of interest are Shimizu and Yamanouchi.
